GANDHI INSTITUTE OF TECHNOLOGY AND MANAGEMENT

Vision

GITAM will be an exceptional knowledge-driven institution advancing on a culture of honesty and compassion to make a difference to the world.

Mission

- Build a dynamic application-oriented education ecosystem immersed in holistic development.
- Nurture valuable futures with global perspectives for our students by helping them find their ikigai.
- Drive impactful integrated research programmes to generate new knowledge, guided by integrity, collaboration, and entrepreneurial spirit.
- Permeate a culture of kindness within GITAM, fostering passionate contributors.

Quality Policy

To achieve global standards and excellence in teaching, research, and consultancy by creating an environment in which the faculty and students share a passion for creating, sharing and applying knowledge to continuously improve the quality of education.

GITAM School of Science

Vision

Nurturing a high-quality Science Education and Research by providing a best learning ecosystem to create world class academicians and researchers.

Mission

- To teach the most renewed curriculum that lay the foundation for students to start exciting careers in academia, research, and industry.
- To foster an environment of healthy curiosity, an innovative mindset, and a strong desire to contribute to the science world.
- To advance our understandings of the natural processes of Physical, Chemical and Biological systems for a better habitable world.
- To inculcate a strong sense of empathy, integrity, and trust in the GITAM Fraternity with a strong commitment towards society and environment.

VISION AND MISSION OF THE DEPARTMENT

VISION

To provide high-quality education and research in the physics by nurturing an immersive and enjoyable blended learning environment and evolving into a centre of product-based research with an industrial partnership.

MISSION

- An interdisciplinary curriculum to teach students to solve complicated challenges and innovate to meet social demands, from technology to sustainability.
- Foster a dynamic academic environment that promotes curiosity, critical thinking, and application-oriented learning in physics so students can excel in their careers.
- Translate material science, quantum technologies, and IoT research findings into commercialized novel products.
- Inculcate a culture of honesty, compassion, and kindness, motivating students to make meaningful contributions to society.

Programme Educational Objectives (PEOs)

- PEO 1:** Provide a deep understanding of advanced electronic concepts to foster excellence in diverse career paths within electronics and related industries.
- PEO 2:** Make use of acquired knowledge and skills to tackle real-world challenges, contributing to technological advancements and societal benefits.
- PEO 3:** Instil strong communication, leadership, and teamwork abilities for effective collaboration and the ability to take on leadership roles.
- PEO 4:** Provide guidance to uphold ethical values, integrity, and a commitment to lifelong learning, ensuring continuous personal and professional growth and making a positive impact on society.

PEO Articulation

	PEO1	PEO2	PEO3	PEO4
M1	3	3	2	2
M2	3	3	2	2
M3	3	3	2	2
M4	2	2	3	3

3 - High Correlation, 2 - Medium Correlation, 1 - Low Correlation

Programme Outcomes (POs) and Programme Specific Outcomes (PSOs)

At the end of the Programme the students would be able to demonstrate:

PO1: The graduates should be able to demonstrate the acquisition of:

- Advanced knowledge about a specialized field of enquiry with a critical understanding of the emerging developments and issues relating to one or more fields of learning.
- Advanced knowledge and understanding of the research principles, methods, and techniques applicable to the chosen field(s) of learning or professional practice.
- Procedural knowledge required for performing and accomplishing complex and specialized and professional tasks relating to teaching, and research and development.

PO2: The graduates should be able to demonstrate the acquisition of:

- Advanced cognitive and technical skills required for performing and accomplishing complex tasks related to the chosen fields of learning.
- Advanced cognitive and technical skills required for evaluating research findings and designing and conducting relevant research that contributes to the generation of new knowledge.
- Specialized cognitive and technical skills relating to a body of knowledge and practice to analyze and synthesize complex information and problems.

PO3: The graduates should be able to demonstrate the ability to:

- Apply the acquired advanced theoretical and/or technical knowledge about a specialized field of enquiry or professional practice and a range of cognitive and practical skills to identify and analyze problems and issues, including real-life problems, associated with the chosen fields of learning.
- Apply advanced knowledge relating to research methods to carry out research and investigations to formulate evidence-based solutions to complex and unpredictable problems.

PO4: The graduates should be able to demonstrate the ability to:

- Listen carefully, read texts and research papers analytically and present complex information in a clear and concise manner to different groups/audiences.
- Communicate, in a well-structured manner, technical information and explanations, and the findings/results of the research studies undertaken in the chosen field of study.
- Present in a concise manner view on the relevance and applications of the findings of recent research and evaluation studies in the context of emerging developments and issues.
- Meet one's own learning needs relating to the chosen fields of learning, work/vocation, and an area of professional practice.
- Pursue self-paced and self-directed learning to upgrade knowledge and skills, including research-related skills, required to pursue a higher level of education and research.
- Problematize, synthesize, and articulate issues and design research proposals.
- Define problems, formulate appropriate and relevant research questions, formulate hypotheses, test hypotheses using quantitative and qualitative data, establish hypotheses, make inferences based on the analysis and interpretation of data, and

predict cause-and-effect relationships.

- Develop appropriate tools for data collection for research.
- Use appropriate statistical and other analytical tools and techniques for the analysis of data collected for research and evaluation studies.
- Plan, execute, and report the results of an investigation.
- Follow basic research ethics and skills in practicing/doing ethics in the field/ in one's own research work.
- Make judgements and take decisions regarding the adoption of approaches to solving problems, including real-life problems, based on the analysis and evaluation of information and empirical evidence collected.
- Make judgement across a range of functions requiring the exercise of full responsibility and accountability for personal and/or group actions to generate solutions to specific problems associated with the chosen fields/subfields of study, work, or professional practice.

PO5: The graduates should be able to demonstrate the willingness and ability to:

- Embrace and practice constitutional, humanistic, ethical, and moral values in one's life.
- Adopt objective and unbiased actions in all aspects of work related to the chosen fields/subfields of study and professional practice.
- Participate in actions to address environmental protection and sustainable development issues.
- Support relevant ethical and moral issues by formulating and presenting coherent arguments.
- Follow ethical principles and practices in all aspects of research and unethical practices such as fabrication, falsification or misrepresentation of data or committing plagiarism.

PO6: The graduates should be able to demonstrate the acquisition of knowledge and skill sets required for:

- Adapting to the future of work and responding to the demands of the fast pace of technological developments and innovations that drive the shift in employers' demands for skills, particularly with respect to the transition towards more technology-assisted work involving the creation of new forms of work and rapidly changing work and production processes.
- Exercising full personal responsibility for the output of own work as well as for group/team outputs and for managing work that is complex and unpredictable requiring new strategic approaches.

PSO1: Learn and comprehensively understand advanced electronic theories, principles, and methodologies to drive expertise in the field.

PSO2: Cultivate analytical and problem-solving skills to design, analyze, and optimize electronic circuits and systems.

PSO3: Foster independent and collaborative research capabilities to generate new knowledge and innovations in electronics.
